

JULIAN SHAW

C# / .NET & Azure Developer | Power Platform | AI & Agentic Systems Engineer

70 Attlee Close, Thornton Heath, CR7 7FA, United Kingdom | +44 7448 154768 | julianshaw2000@gmail.com | julianshaw2000.com

PROFESSIONAL SUMMARY

Full Stack Developer with 20+ years of experience delivering business-critical applications in C#, ASP.NET and .NET, including a decade building enterprise systems for 25,000+ users on ASP.NET MVC and SQL Server at Saudi Aramco. Extensive experience across the Microsoft stack — Azure App Services, Functions and Azure SQL, REST API integrations, and CI/CD via Azure DevOps — delivering both greenfield builds and modernisation of legacy business systems. Currently Founder & CTO / Lead Engineer at Auditraks, architecting a multi-tenant .NET/Azure SaaS platform, and comfortable working directly with stakeholders to scope, build and support scalable solutions. Brings hands-on AI and automation experience (Azure AI Services, Claude-powered development, Model Context Protocol) as a natural fit for organisations investing in AI-enabled automation.

CORE TECHNICAL SKILLS

Languages & Frameworks: C# • ASP.NET (MVC / Core / Framework) • .NET 9/10 • JavaScript • TypeScript • HTML5 • CSS

Data: SQL Server • PostgreSQL • REST APIs (JSON/XML)

Cloud & DevOps: Microsoft Azure (App Services, Functions, Azure SQL) • Azure DevOps • Git • CI/CD • Docker

Platform & Security: Multi-tenancy • RBAC • Microsoft Entra External ID (MSAL + PKCE) • Stripe billing

Frontend: Angular 21 • @angular/localize (i18n / RTL)

Desirable / Additional: Azure AI Services & AI Foundry • Power Automate (early exposure) • Enterprise business applications • ITIL awareness

AI & AUTOMATION EXPERIENCE

Early adopter and power user of Claude and Cursor IDE for AI-assisted software development — architectural reasoning, automated refactoring, agentic workflow orchestration and test generation. Built two MCP (Model Context Protocol) servers exposing 55 AI tools for risk assessment, churn prediction and natural-language queries on the Auditraks platform. Additional exposure to RAG pipelines, vector databases and workflow automation (n8n).

PROFESSIONAL EXPERIENCE

Application Engineer — Saudi Aramco 2008 – 2018

- Delivered enterprise systems for 25,000+ users using ASP.NET MVC and SQL Server, including the Project Safety Management System and internal tooling used at scale.
- Worked directly with business stakeholders across a large organisation to scope, build and support mission-critical applications, gaining deep experience in enterprise deployment, testing and long-term maintenance.
- Maintained technical specifications for process control systems and developed internal estimating tools and safety management systems, working within a QA / ISO 9001 and GAMP-compliant environment.

Founder & CTO / Lead Engineer — Auditraks — 3TG Supply-Chain Compliance SaaS Nov 2025 – Present

- Architected a multi-tenant B2B compliance platform for tungsten, tin, tantalum & gold (3TG) supply chains, covering RMAP, OECD DDG, SEC Form SD and DFARS.
- Built the full stack: a .NET 9/10 vertical-slice API (MediatR CQRS, Result pattern) and an Angular 21 SPA with Supplier, Buyer and Admin portals, integrated via REST APIs.
- Implemented Microsoft Entra External ID (MSAL + PKCE) authentication and Stripe billing; deployed and supported the platform on Azure.
- Shipped two MCP servers (55 AI tools) exposing the platform to AI assistants, including AI risk assessment, churn prediction and natural-language queries.

SELECTED INDEPENDENT PROJECTS

Alongside my primary engineering roles, I design and ship a portfolio of independent SaaS products end-to-end — architecture, development, deployment and support. Summarised briefly below; full detail available on request.

Lead Engineer — Arab Africa Global Business Summit (AAGBSE) (2026) Angular/.NET event-registration platform for 20,000+ users; multi-tier ticketing, Stripe payments, trilingual (EN/AR/FR) with RTL support.

Founder / Lead Engineer — PropKat / PropertyAI (Nov 2025 – Jan 2026) UK property & maintenance management SaaS; Angular/.NET API, PostgreSQL, multi-tenant isolation, Stripe subscriptions.

Founder / Lead Engineer — CityHistoryWalks (Jul 2024 – Present) Self-guided city walking tour PWA; MapLibre, Supabase, Stripe-gated premium content.

Developer — Carib Condominiums Gate Management System (Aug 2024 – Present) Gate management system (Angular, Firebase, Python); real-time monitoring, visitor logging, camera integration.

Founder / Lead Engineer — Legal-JM (Jan 2025 – Aug 2025) AI-driven legal document review platform; ingestion/proofreading workflows, RAG-based document automation.

Product Engineer — Job Seekers Progress Notes App (Jan – Feb 2026) Angular coaching/tracking tool with voice-to-text session capture and AI-generated CV summaries.

Developer — jaPOS (Jun – Aug 2025) Windows retail POS system built with Flutter.

Contract Developer — Real Digital International (Jan – Jun 2023) Angular/C# stock tracking system with barcode scanning, reducing inventory discrepancies by 25%.

Founder — Zeolite Technology (no longer trading) (2018 – 2021) Property rental systems and REST API integrations for FX/stock trading automation; automation tooling and safety-system support for Aramco.

CONTROL SYSTEMS ENGINEERING EXPERIENCE

Systems: Honeywell DCS • ABB DCS • PLC Programming • SCADA

Core Skills: QA / ISO 9001 • GAMP Compliance • Process Automation • Lean Sigma

Control Systems Estimate Engineer — Saudi Aramco (2008–2018); Site Automation Engineer — GlaxoSmithKline UK (2003–2006); Project Engineer — Honeywell Control Systems (2002).

EDUCATION & CERTIFICATIONS

MSc Information Technology — University of Liverpool

BSc Computer Science — University of Massachusetts, USA

- Agile Expert Certified (AEC)
- Certified SCRUM Master (CSM)
- IBM Generative AI (2023)
- ISO 9001 Quality Management
